BEHAVIORAL SERVICES

Print and cut out the cars. You might choose to laminate them and the road sheet. Add velcro dots or a strip along the road, as well as on the backs of the cars.

Have your child choose 1 of the cars for the trip. Start the car at the “START” house. As you move through your drive or road trip, move the car up the road little by little, or tell your child when to move the car to the next space. This will help your child to visualize how much longer until you get to your destination!
